

# YOUR RESPONSE TO THE CRISIS AFFECTING SOUTH SUDANESE REFUGEES IN UGANDA

## DONATION IMPACT REPORT

**With your kindness and generosity, you have had a real and profound impact at a critical time.**

### **Your support is already making a difference!**

With your help and support, refugees have been able to start rebuilding their lives and will find a way through this crisis.

Already we have improved food security by providing crop seeds and livestock. Cash grants for income generating activities (IGAs) have helped people to save their business at a time when trade and purchasing has been restricted.

In terms of provisions, your support has given families cooking equipment and gardening tools, and it has helped to provide health centers and clinics with hygiene supplies and PPE. Our partners have also been able to provide *Gender Based Violence* training to combat rise in domestic violence issues.

**Your gift has been meaningful and impactful.** On behalf of our partners and everyone at Canadian Lutheran World Relief, **thank you.**

The COVID-19 pandemic has been a terrible setback for people who were already in a tough fight against displacement and insecurity.

The loss of jobs, reduced income, higher food prices and lockdowns put people in increasingly difficult situations, and the isolation and hardships suffered by families put many women and children at an increased risk of domestic violence.
