

Kennebago Lakes Paddle

The Kennebago Lakes are secluded and beautiful paddles with gorgeous mountain views and legendary fishing. Morton Cutoff Road leads to a public boat access with access to both Little Kennebago Lake and Kennebago Lake, via the Kennebago River. The Logan, a unique landscape full of aquatic plants and wildlife gives paddlers many opportunities to explore coves and shoreline.

1 Morton Cutoff Rd and Tim Pond Rd are primarily used for logging- use caution when driving as logging trucks take advantage of their right-of-way. The **Kennebago Access** is hand-carry only. The access under the bridge is often shared with anglers. Ample parking is available, and a privy is maintained by the Kennebago Lake Camp Owners' Assoc. Little Kennebago Lake is 165 acres and can be reached from this access as well. Paddling around Little Kennebago is about 1.8 miles while a paddle around the Kennebago is about 10 miles.

2 This section of the Kennebago River meanders through forested land, with abundant **mountain views and wildlife**. The paddle back up-river is not too difficult, but paddlers may be forced to walk boats if the water level is low.

3 **The Logan** is a popular fishing spot, and is lots of fun to paddle around and explore. Hugging the east shore, provide the time to paddle back to the river when it's time to paddle back up to the access.

4 **Grant's Camps** is a popular fishing spot. The road is the gateway separating the camps. The lake can be passed on the southwest shore as an access point, with reservable parking available by calling the camps at +1 (800) 633-4815 to reserve.
