SAVE ONE LIFE

OneVoice "Buzz"

*Caring for people with bleeding disorders in developing countries—
one at a time*

April 2020

Dear friends,

As April comes to a close, the entire Save One Life team hopes you and your loved ones are safe and healthy.

May promises to bring better weather, but many other aspects of our daily lives remain unknown. Will we return to normal work life or be able to have friends over to socialize? Personally, I hope to get outside more, while wearing a mask and safely distancing. I've also been climbing the stairs in my own home to stay in shape! (more on that below)

During this time of uncertainty, the Safe One Life team and the board of directors thank you for your continued support of our organization and those living with bleeding disorders in developing countries. Your support shows us that you care and gives our beneficiaries hope!

Enjoy this brief "Buzz" and please stay safe!

Chris Bombardier
Executive Director

Join the at Home Everest Challenge!

On May 22, 2017, Chris Bombardier became the first person with hemophilia to summit Mt. Everest, the tallest of the Seven Summits at 29,029 feet.

Chris often remarks that while on Everest he always felt that the global bleeding disorders community was with him, helping him take that next step forward. This community gave him strength and helped him remain resilient and determined to reach the summit.

To help Chris celebrate his remarkable anniversary we invite you to join his At-Home Everest Challenge!

While staying safe and in the comfort of your own home, climb your stairs 29 times (yes, because Everest is 29,029 feet!), video yourself doing it, make a \$29 donation and challenge 9 of your friends to do the same.

We have until May 22 to reach our goal of \$29,029!

For Sponsors

WATCH FOR THEIR QUOTES ON OUR PAGES SOON!

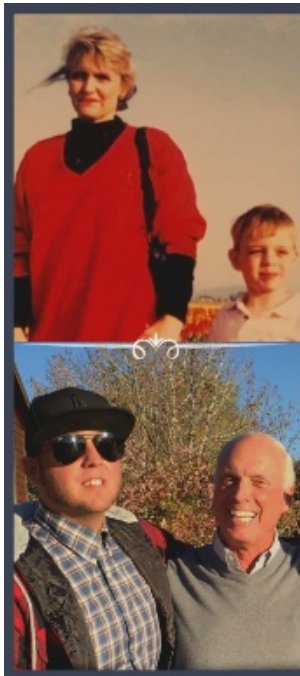

WHY DO YOU SPONSOR?

Send us a quote telling us why you sponsor (and a photo, too!)

If we use your quote on our social media, we will send you a Bombardier Blood Buff.

Send Us Your Quote

I sponsor a young lady [from India] out of respect for my late wife, Rita, who died of colon cancer.

Before her death, she carried our twin sons with severe hemophilia A full-term. One hemorrhaged badly and expired in the womb. The surviving twin is now 33 years old.

Rita succumbed to colon cancer when the surviving twin son was only four years old.

She freely shared her experiences with the author of *Raising a Child With Hemophilia*.

Announcing New Scholarship Program Video Series

Save One Life and Sanofi Genzyme are excited to announce our new Scholarship Program video series. This four-part series provides a deeper look into our programs in developing countries.

Last October, Save One Life had the privilege to meet with past and present scholarship recipients in India. Our organization believes that every person affected by a bleeding disorder deserves a chance and hope

The Save One Life Scholarship Program is

generously supported by:

for the future. An education provides an opportunity to help break the cycle of poverty our beneficiaries experience.

Events Rescheduled

Due to the current public health crisis and for the safety of everyone involved, we have rescheduled upcoming events.

**Wheels for the World
Sunday, September 13.**
