Project SHARE
Report

What is Project SHARE?

Project SHARE (Supplying Hemophilia Aid and Relief) is a humanitarian program of Save One Life that donates factor, a lifesaving blood clotting medicine, to patients with bleeding disorders in developing countries, and to the hospitals and nonprofit organizations that support them.

Founded by Laurie Kelley in 2002 as a program of LA Kelley Communications, donations have:

- allowed students to return to school
- attracted rural patients to urban clinics for treatment and education
- supported life saving surgeries and physiotherapy
- empowered patients and families to create hemophilia societies where none existed

Project SHARE ensures that tens of millions of dollars worth of factor, which would otherwise be destroyed, reaches impoverished people with bleeding disorders. This factor comes mainly from US patients who switch products, hemophilia treatment centers (HTCs), and specialty pharmacies with excess inventory.

A patient receives a factor infusion.

Since Project SHARE's inception, access to factor has greatly improved in the developing countries the program serves. However, over 75% of patients around the world still have little to no access to medication. Project SHARE often receives emergency requests for factor to help save lives and limbs threatened by a bleeding episode.

Despite Project SHARE's continued efforts, our supply of factor often varies. Project SHARE searches for every avenue possible to fulfill each request we receive by working with partners in the pharmaceutical industry, reaching out to contacts in specialty pharmacies and other nonprofits.

After an accident, Edward needed surgery to repair a fracture. He required both Feiba and Novo Seven.

"We were able to donate the factor to where Edward had been admitted and his surgery was a success. Thank you so much for everything that you do for us,"

Sarah Mumbi—Program Partner, Kenya

Supporting our Program Partners through COVID-19

The global pandemic affected everyone around the world, including our program partners. Lockdowns have made getting factor to patients more difficult, but our partners have found ways to make it happen. Save One Life also encountered frequently changing customs rules during the initial phases of the pandemic, thankfully Project SHARE was able to solve these challenges quickly.

Summary of Donations

Category of Medicine	Total IU Shipped
FVIII	14,103,064
FIX	734,054
VWD	3,121,910
Inhibitor	648,654/464mg
Total	18,607,682/464mg

Afghanistan	Armenia	Bahamas
Bahrain	Bangladesh	Cambodia
Cameroon	Cote D'Ivoire	Dominican Republic
Egypt	Ethiopia	Fiji
Gambia	Guyana	Honduras
India	Jamaica	Kenya
Morocco	Nepal	Nicaragua
Nigeria	Pakistan	Philippines
Romania	St Vincent and the Grenadines	Uganda
	Yemen	

Our Impact

Rayyan, Bangladesh

Rayyan is 6 and has struggled with many bleeds over the past year. A recent mouth bleed was extremely worrying.

Project SHARE sent factor to treat his bleed, and Rayyan is doing much better.

Mohammed, Yemen

Yemen is a war-torn country. Amidst this conflict, Project SHARE shipped factor when Mohammed was suffering from a serious knee bleed.

Vhee Jay, Philippines

Vhee Jay was suffering from an iliopsoas bleed when he reached out to the Hemophilia Advocates, a program partner in the Philippines. Thankfully, Project SHARE had recently provided factor to the organization and his bleed could be treated quickly.
