

WETLAND PLANT AND ANIMAL IDENTIFICATION

Brought to you by
California Waterfowl

Background

Before the field trip: Use this slideshow to help familiarize students with the organisms they may encounter on their field trip! Remember that you may not always see these animals, but that doesn't mean they aren't there! We can hear them too. Be sure to keep the volume up to listen to different calls.

After the field trip: Use this slideshow to review the plants and animals that you got a chance to see, hear and track during your field trip. Make sure to keep sound volume up so students can practice identifying calls as well!

Guide

Use the icons as you flip through the slides to figure out how likely you are to see, hear and find evidence of these animals on the tour.

Likelihood of physically seeing the organism:

	Very Likely
	Somewhat Likely
	Unlikely

Likelihood of hearing the organism:

	Very Likely
	Somewhat Likely
	Unlikely

Likelihood of finding evidence of the organism:

	Very Likely
	Somewhat Likely
	Unlikely

BIRDS

Mallards

Moorhen

Red-Winged Blackbird

Red-Shafted Northern Flicker

Northern Shoveler

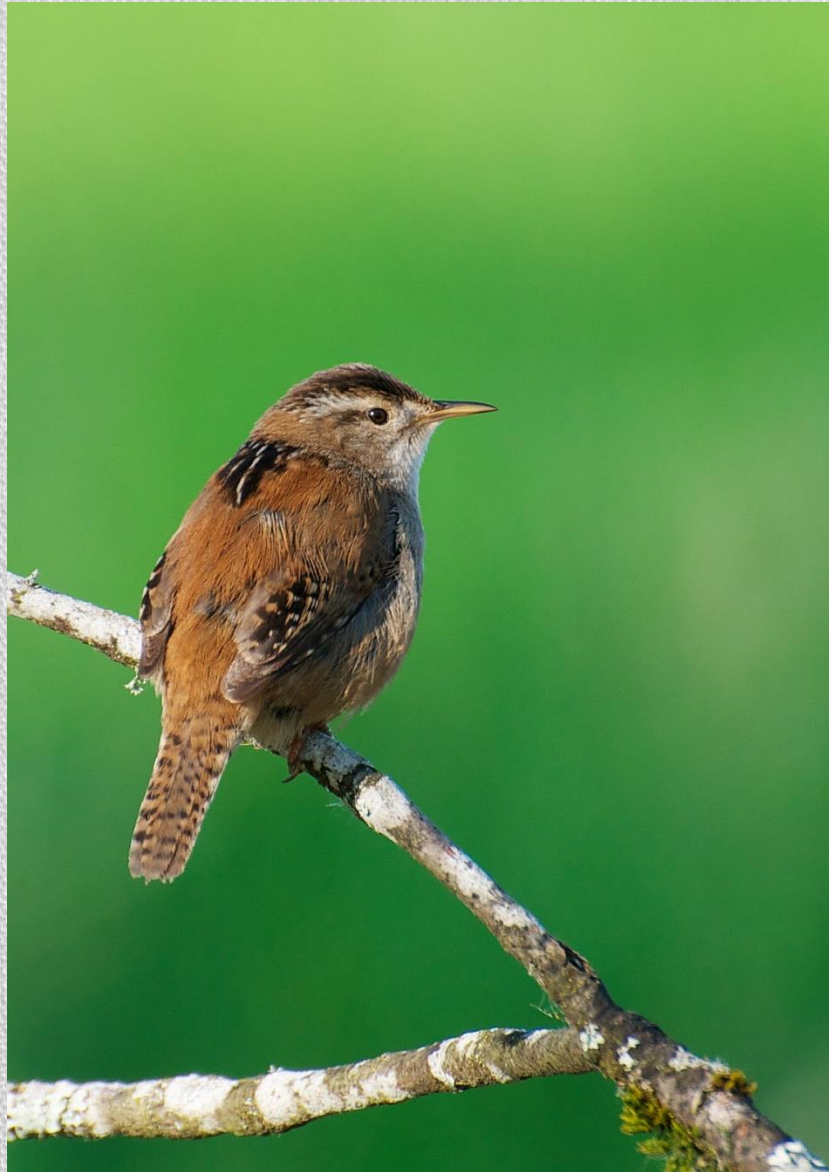

Red-Tailed Hawk

American Kestrel

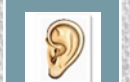

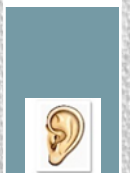

Marsh Wren

Black-Neck Stilt

American Coot

Turkey Vulture

Cinnamon Teal
