

ST. JOHN'S EPISCOPAL HOSPITAL  
EPISCOPAL HEALTH SERVICES INC.

# Ambulatory Care Pavilion

Fall of 2022, SJEH will open a new state-of-the-art Ambulatory Care Pavilion on the hospital's campus. The new Pavilion will offer an integrated delivery system of care which will include the co-location of primary care, specialty care and outpatient behavioral health services in one building. The four (4) story facility will consist of:

- A level three certified primary care medical home, co-located with outpatient behavioral health services on the first floor
- Outpatient behavioral health services on the second floor
- Ambulatory services such as medical oncology, infusion services and endoscopy services will be located on the 3<sup>rd</sup> and 4<sup>th</sup> floors.

This new facility will improve core population health and patient outcomes by focusing on preventive care, early diagnosis, care coordination, enhanced access to quality care, co-existing mental health and implementation of evidence based protocols within the patient centered medical home model that will improve the health of the population.

The new Ambulatory Pavilion will help to not only improve the health of the community by offering expanded outpatient services, but will help St. John's develop a stronger integrated delivery system that provides strengthened outpatient behavioral and mental health services to the community.
